MARKET REPORT

SUPPLY & QUALITY UPDATES

PETITE ROMAINE HEARTS

Remains very limited and on strict allocations. This is expected to last through mid-June. We are filling in with Jumbo Romaine Hearts and Organic as availability permits.

CHERRIES

California grown product will run for another couple of weeks then we will switch to Pacific Northwest product.

BLACK MISSION FIGS

First growth of Black Mission Figs are due in this week from the Fresno area. These are the breba crop produced on the previous years growth. They will gap for a few weeks, then the new main crop will produce for the summer.

CORN

Brentwood grown corn is starting up this week! White will start this week, with Yellow and Bi-Color coming along next week. Sizing is still a struggle in the Desert.

ASPARAGUS

California grown Peacock and Delta Queen will wrap up in about 10/14 days. PNW volume will remain steady during that time and Baja production is picking up. Jumbo will continue to be limited in all growing areas.

WEATHER FORECAST

GROWING CONDITIONS ACROSS REGIONS

CALIFORNIA

Weather is mostly favorable in the Salinas Valley with the exception of some rain this week. We will see how that plays out with the otherwise normal warmer temps.
