MARKET REPORT

SUPPLY & QUALITY UPDATES

LIMES

Heat, humidity and rain are still affecting quality coming out of Mexico. Fruit conditions are causing further inspections at the border meaning extended delays.

APPLE SEASON

New in stock from Cuyama Orchards in Kern County with their Sweetie Apples which is a mix of Gala/ Braeburn with sweet crisp flesh. In a few weeks we will see Oz Farms Organic Heirloom Apples such as Belle de Boskoop, Holstein, King Thompkins, Newton Pippin and more! All grown out here on the coast of California in Point Arena.

LETTUCE

Broad spectrum of lettuce items all struggling from weather and disease. We're seeing availability and quality issues. Value added lettuce items also very short and being prorated.

MANGO

Recent growing region transition from MX to Brazil and weather causing some internal discoloration. This should correct itself over the next ten days-two weeks with proper gassing and handling.

CAULIFLOWER

Cauliflower supplies remain very tight as production for most suppliers have gapped. Heavy Diamondback Moth pressure, especially in South County and Santa Maria, continues to severely impact yields. Warm weather is adding to field challenges, with little improvement expected. Some suppliers may need to source outside product to fill orders. Expect limited supplies and a difficult market to continue.
