# PRODUCE NOTES

**ASPARAGUS:** Mexico asparagus supplies remain limited and expensive. Jumbo supplies are subject to gapping as cool, wet weather has slowed crop maturity.

**BERRIES:** Strawberry supplies tightened following recent Central California rain, resulting in higher prices and reduced shelf life. Blackberry supplies are improving from Mexico. Raspberry supplies remain limited due to weather impacts in both Mexico and Oxnard. Peruvian blueberries remain available with steady quality and pricing.

**BEANS:** Coke Farm Organic Blue Lake Beans are back in stock this week and are expected to remain available through Thanksgiving, weather permitting. Conventional Blue Lake Bean quality is strong, although pricing remains elevated. Organic Purple Wax Beans are limited to remaining inventory and will be finished for the season once sold through, while Organic Yellow Wax Beans are now finished for the season.

**BEETS:** County Line Harvest Organic Baby Chioggia, Baby Gold and Red Beet supplies are limited to stock on hand and then are gapping for a week. We are filling in with Babe Farms clip-top beets as available.

**BROCCOLI & CAULIFLOWER:** Broccoli crown supplies are steady. Organic Broccoli De Ciccio remains in a gap. Salinas cauliflower supplies are stable with improved pricing, while colored cauliflower remains limited due to insect pressure.

**CABBAGE:** Green, Kohlrabi, Napa, Red Napa and Red Cabbage supplies have been limited and prices remain on the high side. Salinas Valley Cone Cabbage is back in stock with steady supplies. Shredded Green and Red Cabbage supplies and prices are back to normal. Organic Napa Cabbage is back in stock.

**CHICORIES:** Brisa Ranches Organic Mixed Chicories remain limited due to high demand and slow growth. Babe Farms Blond Frisee supplies are steady while Organic 24ct Frisee remains unavailable.

**HERBS, MICROGREENS & EDIBLE FLOWERS:** Fresh herb programs have transitioned to 1 lb and 4 oz pack sizes. Epazote is gapping this week. Specialty microgreens remain constrained, particularly Citrus Mix and Garlic Flowers. Recent heat continues to impact edible flower production and substitution options remain limited.

**LETTUCE:** INSV pressure continues to impact Iceberg, Romaine, Green Leaf and Red Leaf lettuces, resulting in elevated pricing and limited availability. Butter Lettuce, Little Gem, Artisan Blend Mix and Mini Romaine remain subject to gapping. Gotham Greens Mixed Medley and Salanova products continue to serve as fill-in alternatives.
